

JLG Attachments

JLG Attachments - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

All through their trip, John reacquainted himself with previous business associates along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite market for a product that could promptly and securely elevate people in the air to accomplish upkeep and other building services.

After returning from their vacation, John set up a joint venture with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design elements of that original lift into current versions.

JLG lift trucks have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into different marketplaces globally and develops new products to ensure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
