

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental company that consists of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States partner, Doosan Infracore America Corporation, operating in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer wishes.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Additionally, there are more than 90 independent dealers moving forklift equipment and materials handling equipment. This network enables Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line impressively includes 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American marketplace, due to its outstanding level of product performance and their consistently high level of consumer support and service given to all Doosan Infracore Lift Truck clients. The U.S. lift Truck division situated in Cleveland has a expert team experienced in Sales, Purchasing, Marketing, Logistical and Technical Support.

Initially the home-based lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a home-based equipment expansion project. Sales of these products were originally targeted to state-run companies, large scale organizations, and the military. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a position of significant growth of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling industry. This project proved highly lucrative for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed construction of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a international sales network and started exporting designs they had developed through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international markets.
